Estate Gate™ The aluminum pickets provide beauty and security to your entry. Using either solar or AC power, the gate can be placed in any location. Custom styles are available. Maximum opening 16'

Estate Gate II™ The PVC rails are a perfect match for PVC fencing. Maximum opening 14'

Estate Gate III™ Aluminum rails have the look of the PVC but can be powder coated a variety of colors. Maximum opening 14'.

Ranch Gate™ Aluminum pipe 2" diameter has the look of the standard stock gate and is well suited for high wind locations. Maximum opening 18' and can be powder coated.

Estate Gate Series Manufactured by: *Mazza Designs, Inc.*

All Estate Gates are vertical pivot gates. They lift out of the snow.

The Estate Gate

The pickets provide the look of a Traditional Estate Gate. The aluminum tube construction ensures long life and easy operation. Designs can be altered to create a curved top appearance. The pickets are capped with either flat plastic caps or spear points. The 16' span gate offers a beautiful entry with the convenience of the vertical pivot gate. While opening, the pickets pivot to form a single compact upright stack. Available in the standard powder coated colors.

Estate Gate II

This is a perfect match for three-rail PVC fencing. The barrier arms are 2" x 6" PVC rails, which is the same material as the white PVC fencing. The gate opens in less than 10 seconds. When open, the gate provides a 13'-6" wide path for cars and trucks. It is only available in white.

Estate Gate III

The Estate Gate III uses 2" x 5" aluminum rails to create the barrier. The aluminum can be powder coated a variety of colors. Standard colors are black, patina green, forest green, brown, and white. This gate is well suited for windy areas.

Ranch Gate

Originally developed for the northern Wyoming ranch country. The rails are 2" round tube and can cover an opening up to 18 feet wide. This is a great gate for property that requires a wider passage for trucks or farm equipment. It has excellent wind resistance. Available in the standard powder coated colors.

The installation hardware and instructions are included with every gate.

WARRANTY: All estate gates have a 2 year limited warranty against manufacturing defects.

* * *

Every Estate Gate is battery operated and must have a solar or AC charging system. If there is a power outage or overcast days, the gate will still operate up to 500 cycles. Estate Gates are remote controlled and come with two transmitters. Optional devices purchased with the Estate Gate are wired and ready for hook up to the gate control panel. All Estate Gates are available as a double gate that opens from both sides. The gate package contains the hinge post assembled with the controls and receiver, the rest post, rail end supports, two anchor bolt assemblies, and any optional devices purchased. The rail package containing the rails, powder coated or PVC, are wrapped to protect the finish as needed.

POWER SUPPLIES: (you must have either one of these)
